COSMETICS

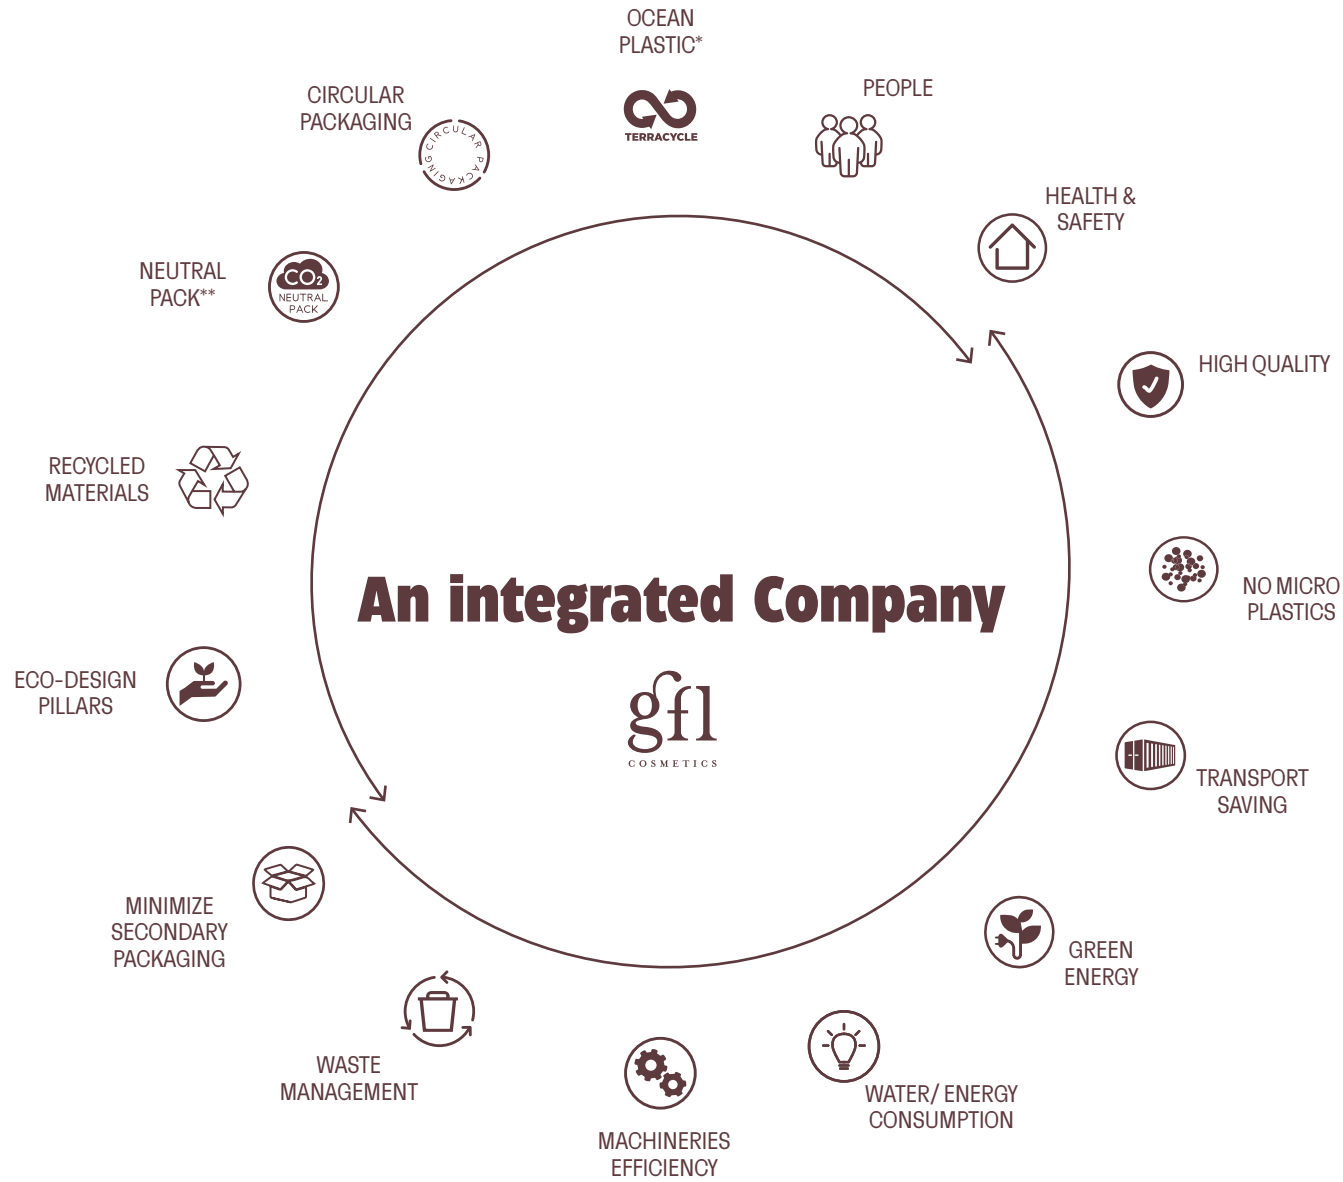

# Welcome to our world

GFL has always been committed to create and develop personal care products through **innovation** and the **latest technology**, with **selected formulas** made of the **finest natural and organic certified ingredients** to meet the requirements of different types of consumers.

**GFL's distinctive strength and creative approach are the pillars of our innovative and sustainable solutions with a positive impact on the environment and people.**

GFL is the expression of the contemporary transition towards a **circular economy** and **sustainable development focused on people, planet, prosperity, peace and partnership.**

(UN AGENDA 2030 FOR SUSTAINABLE DEVELOPMENT)

\* For customer special project  
 \*\* Applied to Geneva Green

## Milestones

1995. Guido Bonadonna and Luigi Rossi, two young men in their early twenties, received a request from one of Milan's leading publishers for a soap infused sponge giveaway. Unable to find a manufacturer, they decided to make the sponge by themselves. A new journey with real vocation for hôtellerie just started in their Milan basement.
1998. GFL new headquarters opened in Opera, Milan.
1998. GFL introduces the use of PET for its products for the first time.
2005. First patented wall bracket dispenser.
2009. GFL obtains the first Ecolabel certification on a cosmetic range.
2010. GFL new production plant inaugurates in Siziano, south of Milan: 18,500 sqm. in total.
2011. GFL opens its new headquarters in Lugano, Switzerland.
2012. GFL launches one-piece tube solution.
2015. GFL opens its branch office GFL USA in New York.
2017. GFL expands its manufacturing plant up to 25,000 sqm.
2018. GFL opens its branch office GFL Middle East Trading LLC in Dubai, UAE
2019. GFL starts distribution across Asia Pacific region with a regional office located in Australia.
- 2021 GFL opens its office in London, UK

# Company

**Headquartered in Lugano** Switzerland, GFL has branch offices in **Milan, London, New York** and **Dubai**.

The **Italian 25,000 sqm. production plant** is situated south of Milan and it is **completely powered by energy from sustainable sources**.

GFL invests in technology and innovation operating an **horizontal and vertical integrated management system, the true essence of sustainability for the contemporary Made in Italy**.

## We think Green

“**Design for sustainability**” is the key principle that drives our research, design, and manufacturing. We think green at every possible stage of **product development, production, and supply chain** to contribute to the respect for the environment.

Our Eco-design pillars are focused on **plastic reduction** and on **efficiency, maximization, and circular management** of all the resources involved in the creation of value.

## Our eco-design pillars

1. To continue to develop products with impact and bring our lines from linear to circular design: introduction of post-consumer materials, ocean plastic, labels that come off easily during recycling, the selection of local suppliers, internalization of production.
  2. To choose products with less environmental impact.
3. To reduce CO2 emissions by reduction in consumption of water, gas, and electricity.
  4. To compensate our CO2 emissions for products as extensively as possible.
5. To study products to optimize pallets, (epal stackable minimum 90% truck filling).

# Energy and waste management

Since 2018 we have been using **energy from 100% renewable sources\***.

We use **Post-Consumer recycled plastic and PET**, to reduce CO2 impact and CO2 emissions, we compensate our footprint and set ecological targets constantly.

We deliver production wastewater to the largest and most technologically advanced Italian wastewater treatment center. Their **top-wet oxidation technology** allows to break down the organic charge by transforming 100% of non-biodegradable waste into highly biodegradable substances that can return to nature.

\*the data refers to the Italian plant of Siziano

RECYCLING COMMITMENT	TODAY	2025 GOALS
Bottle packaging recyclability	95%	98%
Soap packaging recyclability	90%	95%
Bottle closures recyclability	30%	50%
%of recycled plastic for bottles	30%	70%
% neutralized CO2 Products**/revenue	5%	25%
% certified Product/revenue	22.5%	45%

\*\*only packaging

## ECO PILLARS

GREEN ENERGY

RECYCLED MATERIALS

CIRCULAR PACKAGING

## Where do we get r-PET from?

The current technology of selection and recycling ensures that PET bottles are among the most easily selectable and recyclable types of packaging. Recycling starts with the collection of plastic scrap waste, to be regenerated into new reusable materials.

### **PLASTIC RECYCLING STEP BY STEP:**

1. Collect plastic bottles
2. Clean and shred them
3. Extrusion
4. Process them into small granules
5. Create new raw materials

## **We believe in ethics, we believe in corporate social responsibility**

At GFL, we believe in the ethical principles of moral legitimacy, fairness, equality, transparency, honesty, confidentiality, impartiality and protection of health.

Through our ethical code, we aim to share and consolidate these principles among our employees and collaborators, as well as our customers, suppliers and partners.

Every year, Ecovadis makes an assessment on our CSR (corporate social responsibility) to track progress on environmental topics, labour and human rights, ethics and sustainable procurement.

---

### **ECO PILLARS**

PEOPLE

# Green Certifications

We apply the most contemporary concepts and select the highest quality raw materials to create our formulations. From environmentally friendly cosmetics certified by Cosmos Organic, Nordic Swan Ecolabel, Eu Ecolabel and RSPO, to high-impact lifestyle product collections.

**COSMOS** is an international standard which enables the labelling of natural and/or organic cosmetics. All the products marked with the Ecocert/Cosmos logo have been verified from composition to processing and packaging to guarantee environmentally friendly production, development of the concept of green chemicals, responsible use of natural resources, respect for biodiversity, absence of petrochemical ingredient and GMO, and recyclable packaging.

**Eu Ecolabel**, granted by the European Commission, is a label of environmental excellence that is awarded to products and services meeting high environmental standards throughout their life-cycle: from raw material extraction, to production, distribution and disposal.

**Nordic Swan Ecolabel** is an eco-labelling scheme born in the Northern European Countries, that evaluates a product's impact on the environment. Products awarded with the Nordic Swan Ecolabel must meet strict environmental requirements in all relevant phases of their life cycle and strict requirements regarding the chemicals used in the formulas.

**RSPO** is an internationally recognised certification standard for sustainable palm oil. GFL is an RSPO supply chain certificate member, supporting the production of sustainable palm oil.

**VEGANOK** is the first and best known Ethical guarantee mark for Vegan products, with over 1000 companies and services, and tens of thousands of products certified around the world.

# Manufacturing

In our 25,000 sqm. production plant, **completely powered by energy from sustainable sources**, we follow our eco-design principles while manufacturing vegetable soap and many shapes and sizes of **injection moulded plastic bottles**; these are filled on site using highly efficient production lines.

MANUFACTURING CAPACITY	PER YEAR
Solid soaps	240 million
Bottles - mini size	160 million
Dispensers	75 million
Empty bottles	170 million
Doypacks	30 million
Towels and sachets	170 million

100% made in Italy, GFL carefully selects its partners on the national territory to guarantee the quality and efficiency of its supply chain.

# Research & Development

---

<b>200</b>	chassis of formulas between washers and emulsions
<b>30</b>	formula chassis for solid soaps
<b>80</b>	Perfumes made with exclusive formula
<b>500</b>	Selected and safe ingredients
<b>20,000</b>	Analysis a year on raw materials, finished products and packaging

---

Our laboratory with its team of people specialized in the cosmetological field carries out research and development activities for the creation of new formulas, research of new raw materials aimed at satisfying market demand and customer needs.

Safety and effectiveness guide all our choices, from raw materials to packaging. Our cosmetics must pass continuous tests from dermatological (patch test, challenge test, allergen test) to efficacy tests by certified institutes and visual-olfactory evaluations that ascertains the achievement of the desired effect during and after use.

We run on-site stability and compatibility tests of our products to guarantee a standardization of PH, temperatures and viscosity throughout the processing.

## Our safety and quality guaranteed

Since 2018, the safety and quality of GFL's cosmetic products has been guaranteed by the IFS HPC certification. IFS HPC is a recognised standard aiming to ensure that household and personal care producers are able to provide safe, compliant, and quality goods to the market.

- The core of this Standard is the Risk Management, which allows companies to demonstrate that their products do not represent any hazards for health and/or safety of consumers.
- IFS HPC standard covers most of the requirements of ISO22716 (GMP for Cosmetics).
- HPC audit focuses on checking risk management, customer specifications, traceability and crisis management among other parameters.

PRIJA

osmè  
organic

## ABOUT OSMÉ

Osmè Organic are natural and Cosmos Organic Certified cosmetics with extra gentle formulas. The formulation is based on Aloe vera, and enriched with organic extracts, and perfumed with botanical essential oils. Osmè Organic takes gentle care of all kinds of skin and hair, especially those with more sensitivity. It offers a unique and genuine experience. The cosmetics are very delicate; creams and cleansers are tested for sensitive skin and hydration and soothing efficacy.

osmè  
organic

Osmè means perfume, essence; an element capable of creating incredible experiences. Osmè is a delicate collection where the natural element becomes a distinctive signature across various products. The collection is presented in soft and sandy colors with a leaf motif bar soap. The natural feeling of the line is emphasized by intelligent design and recyclable materials.

## ORIGINS

Conscious consumers are becoming increasingly concerned about the environmental impact of their products. Reduced packaging and increased recyclability will become the main priorities in the next decade, research shows. Geneva Green is unique in its circular design approach. Bottles are made with 100% post-consumer recycled plastic r-PET.

This means zero waste to landfill!

## **Cosmetics and olfactive notes**

Geneva Green are high quality cosmetics, formulated with plant extracts such as Aloe Vera and Black Tea, with selected ingredients such as Shea Butter and Keratin for everyday wellbeing to rejuvenate and refresh. Cleansers and creams are characterized by floral citrus, fresh fragrances inspired by nature. The products are all clinically tested with no alcohol, petrolatum and EDTA.
